\*\*Think of this fact-- If you save yourself or a future buyer just \$100.00 per month on energy in the life of a 30 year loan on just the cash savings factor alone, not to mention the interest amortization savings, you will be receiving or in the latter case be giving them a house & \$36,000. That's a new car! That's a child's education fund! Other, Yes! On the average that would be 30% less Co2/Green House Gas Emissions & other pollutants not entering into the environment. This makes your energy efficient house a very Smart Choice! For Commercial Building owners the numbers only go up exponentially!

***This proposal is extended to the parties until 1/31/08. After expiration date the prices & terms are subject to change with out notice& must be verified at time of purchase.***
